HIGH DEFINITION LENSES®

Augen High Definition Lenses®

Progressive Series

HD Trinity® 8/12 Short Progressive

Introducing Augen HD Trinity® 8/12 Short Progressive, giving wearers the comfortable close-up and distance vision they need, even in today's smaller frames.

HIGH DEFINITION LENSES®

Trinity® 8/12 Short Progressive Better Vision in Small Frames

The Augen HD Trinity® 8/12 Short Progressive combines an unprecedented 8mm corridor with carefully balanced zones of vision throughout the lens.

Wearers get the comfortable close-up and distance vision they need in an extremely wearable progressive lens, even in today's smallest fashion frames.

Feature	Benefit
8mm Corridor – shortest available!	Quick, easy access to the near zone
Generous near zone high up in the lens	Ample close-up vision once the lens is trimmed for small frames
Well-balanced distance area	The sense of visual freedom wearers expect in a progressive
Quick, easy adaptation	Ensures ease of wear regardless of frame size
Assymetric design	Provides excellent binocular vision

Md Material & Design	S Side
Bc Base Curve	Sn Serial No.
A Addition	
Frame B Measurement 22mm or more	
12mm recommended fitting height	

Augen High Definition

Augen High Definition progressive lenses incorporate patented double aspheric technology that delivers sharp, crisp vision with minimal distortion in the periphery. The unique aspheric front surface optical design is applied to advanced material substrates like Trivex to ensure maximum clarity and light transmittance.

All Augen High Definition Lenses are created from molds produced with our proprietary free form process, ensuring each lens delivers the exact high definition characteristics intended by our design team.
